To the FDA:

RE: Docket No. 98N-1265

Dear Sirs:

I am concerned about the Compounding Section 503A of the Modernization Act, Which infringes on the rights of compounding pharmacists to serve the public's medical needs. I am on estrogen replacement therapy and progesterone.

The only reason for my taking the hormone therapy is that after menopause I began getting urinary tract infections on a regular basis. The only thing that prevents the infections seems to be hormone therapy. I had problems with premarin and did not feel comfortable with estrace so I went to a woman gynecologist who prescribed specially formulated natural estradiol. I feel much more comfortable and confident about the natural hormone and do not wish to have to change.

I would appreciate it if you would reconsider the Compounding Section 503A after all, Pharmacists know their drugs.

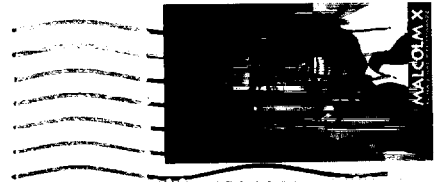

Sincerely,  
*Mrs. Lona Pillers*
